Introduction

Laura
Matthew

We are digital communities Wales and we help organisations to help get more people in Wales online

We do this in lots of different ways, but the most important is to make sure that technology suits the person. We're here today to talk to you about inspiring people to get online!

Who is digitally excluded?

- 15% of adults in wales are currently digitally excluded *
- We want this to change and we want to give everyone in Wales the opportunity and a reason to get online.

* National survey for Wales

- **We are here today for a fun, interactive workshop to help inspire and motivate people to get online.**
- **We will explore digital tools and applications as a way of giving everyone the opportunity to use technology positively.**

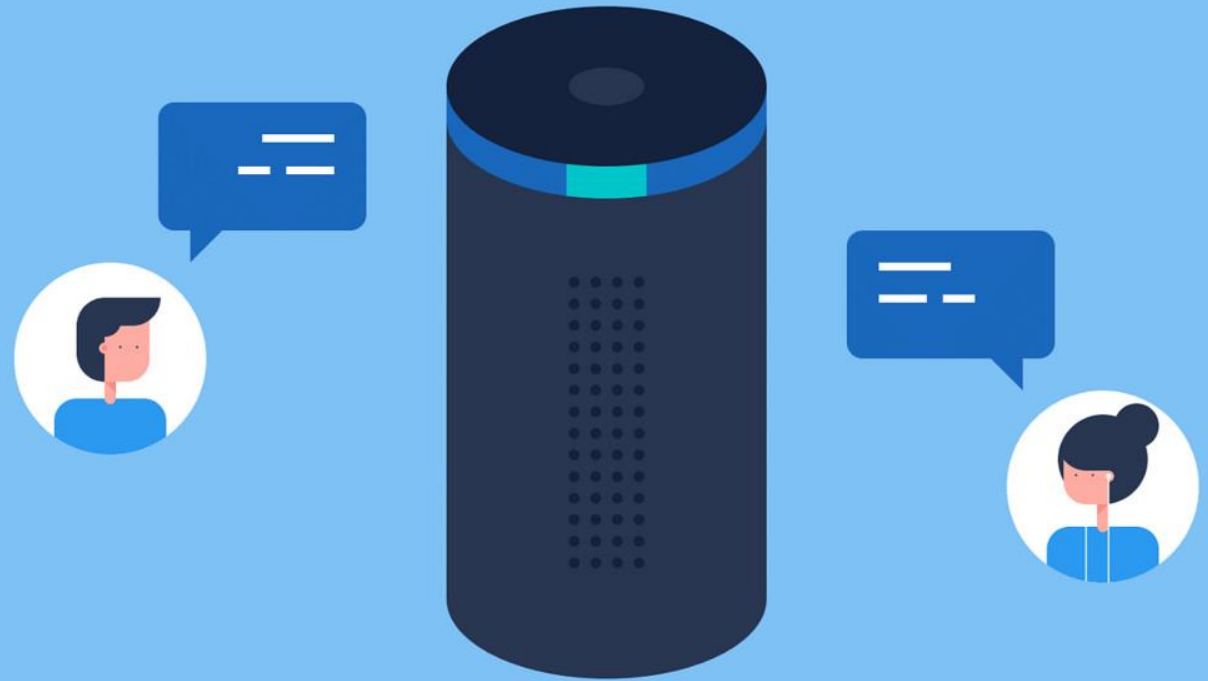

THESE ARE A FEW OF MY FAVORITE THINGS

Have a discussion and make notes of the types of things that people love doing.

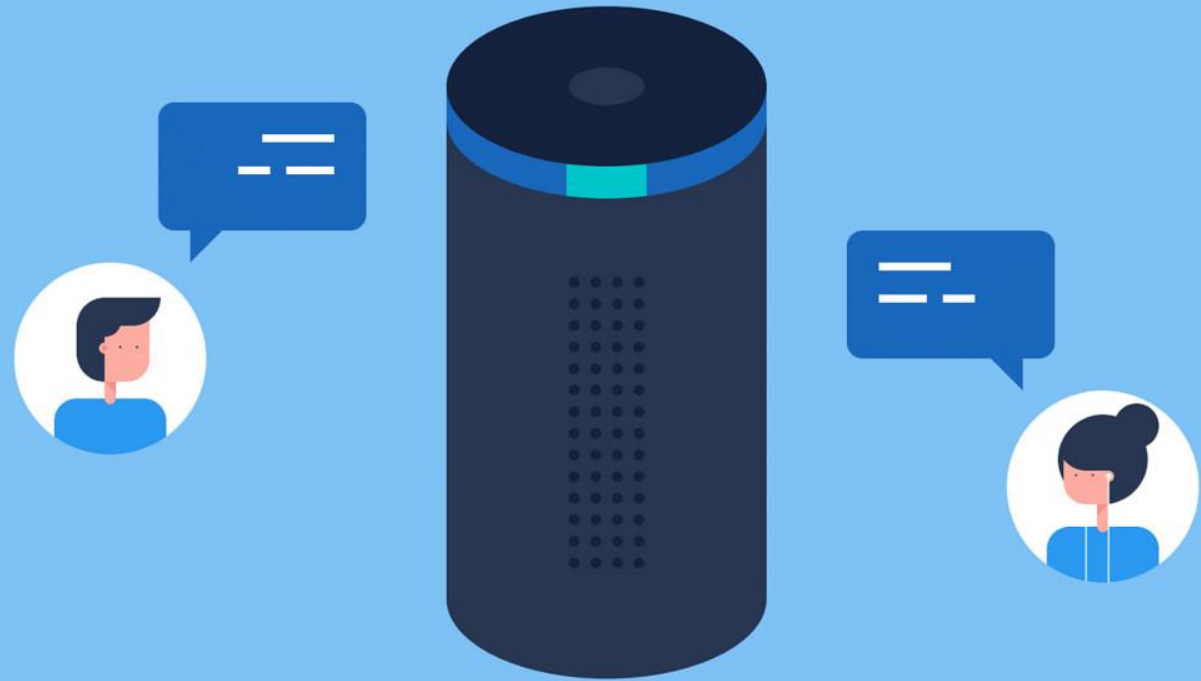

Smart speakers

A smart speaker is a type of speaker and voice activated device with an included virtual assistant

Ask “Alexa”..

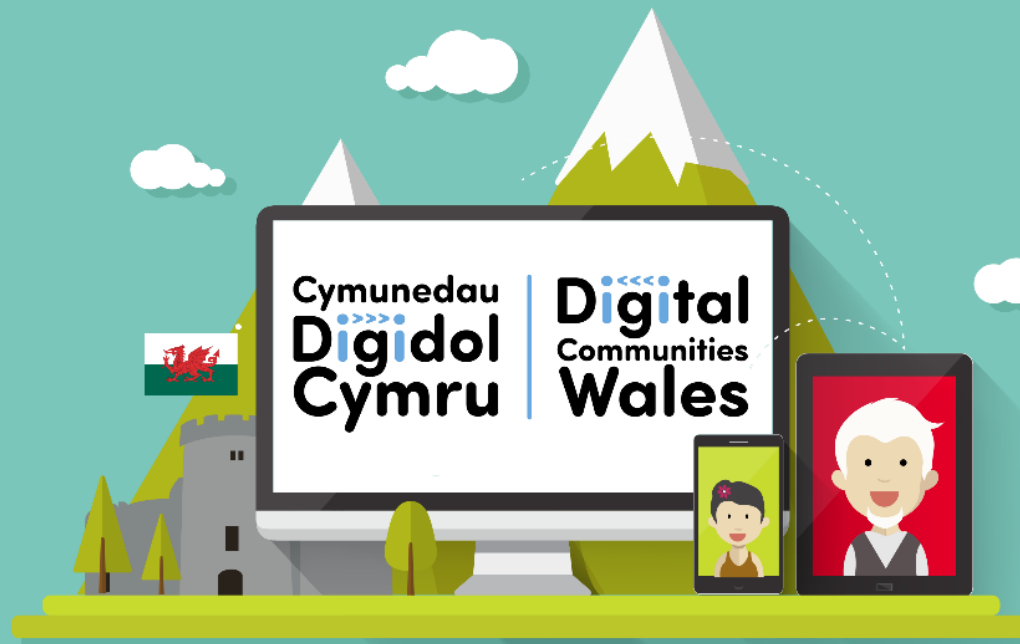

All you need to do is say “Alexa” you should see a blue ring and then you can ask questions

Virtual reality

A headset that shows a fake world which is used through sights and sounds from a computer and your actions can decide what happens.

Thank you!
Diolch yn fawr iawn!
